PREPAID SOLUTIONS

Scratch your scratch cards, and buy a worldwide experience of secure prepaid transactions solutions.

A breakthrough technology.

eVoucher markets a wide range of added value Prepaid Solutions such as e-recharge for mobile phones and calling cards, e-purse & loyalty packages, ticketing (mass events, stadium & concert ticketing), card based prepaid utilities (electricity, water), Lotto & knowledge games, bill payment, pick up points for mail ordering, day-insurance, transport, VAT collection, etc.

Scratch the scratch cards!

This e-Solutions are cost killers. It is the need of scratch cards and need for secure storage and logistics. eVoucher eliminates, truck robberies or warehouse theft. And sales increase through better supply chain - as there is never a shortage of scratch cards - and the introductions of new products. The content providers (as Telecom operators) access the sales data remotely, and may use the voucher for weekly promotions, cross-selling, or product information. They now have an opportunity to communicate directly to their end users.

e-Top Up for mobile phones.

Amongst the pre pay solutions, the mobile phone and calling cards e-Top Up emerge as the hot sales products. As airtime is mainly sold in convenience shops, we have built an efficient off-line solution with the fastest voucher issue in the market. The orders are supported by an ERP and alert levels. The solution integrates a terminal management (TMS) as well as monitoring and reporting tools. It also benefits from the investments made by WITNET in developing a very secure Front-End system.

Both Voucher PIN based on-line and off-line and PINless direct e-Top Up solutions are available.

A cash machine

The eVoucher solutions are designed to generate revenues for the merchant. The solutions offer multi-products, multi-networks, multi distribution channels, with 4-levels of wholesale value. Interface to accounting system and cash management software are also available.

Our users are claiming sales increase between 7% and 28% in first year.

Security is the key

The eVoucher solutions benefit from WITNET daily efforts to improve the security of transactions.

Up to date asymmetric data flow protocols, mutual certifications with POS terminals provide high standards of security.

The system is designed so that it rarely needs any human intervention other than initial setup and basic system administration. All sensitive data elements are encrypted for security and the system has been built on a reliable and stable hardware and software architecture.

- Physical security
- Firewall
- DataBase and OS security
- WebService and session key
- SSL
- Smart Card Tehnology
- IP

Short advantages

Provider: no cost of printing cards and no cost of administration...
